FACT SHEET
ANTIMICROBIAL STEWARDSHIP APP

DHA Defense Health Agency ®

SOLUTION DELIVERY DIVISION

The Antimicrobial Stewardship app contains an array of information on infectious diseases, including guidelines for treating common infectious syndromes, resources for antibiotic dosing, and information on microbes and drug effectiveness by region. The app also contains resources on COVID-19 and Mpox.

Information regarding drug resistant bacterial infections has gained national attention. Additionally, it is well known that delayed, prolonged, or inappropriate use of antibiotics can lead to poor patient outcomes and higher health care costs. The app supports providers in managing their patient populations by ensuring timely access to current clinical tools and resources.

This app was produced by the Web & Mobile Technology Program Management Office, part of the Defense Health Agency Solution Delivery Division.
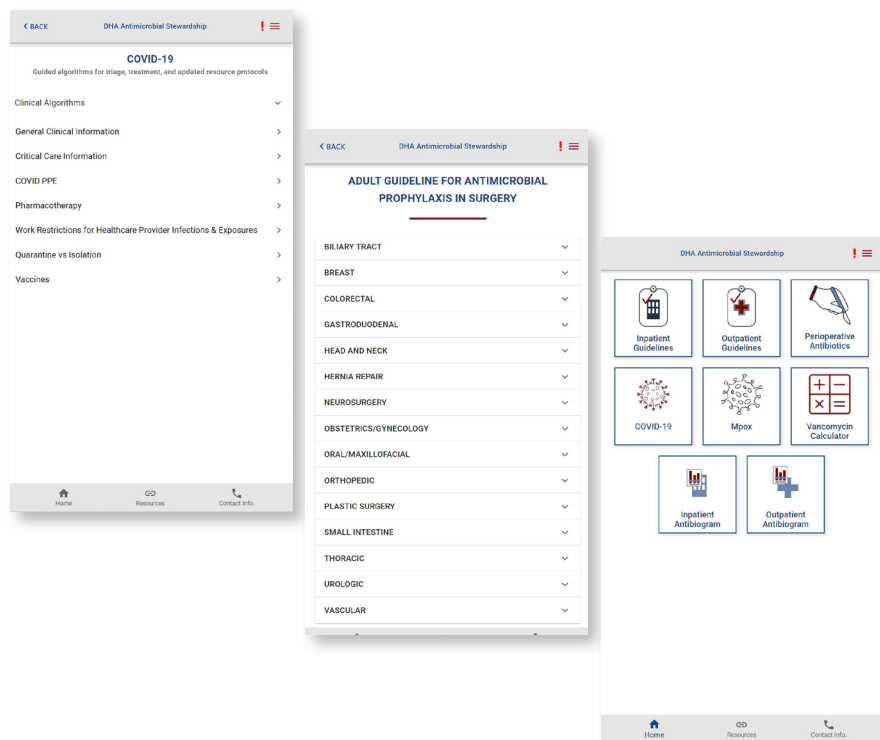

Key Features

‣ Easy to read, user-friendly layout

‣ Simple, point and click process to access resources

‣ Includes calculator to assist in determining the correct dosage

Key Benefits

‣ Provides guidelines for inpatient and outpatient medical settings

‣ Includes treatment protocols for adult and pediatric patients

‣ Uses location based information to determine antibiotic effectiveness against a variety of common infections
