c. Describe the purpose of this DoD information system or electronic collection and describe the types of personal information about individuals collected in the system.

The Vista® Information System (Vista) is a commercial blood center data management solution which interfaces with the Trima Accel® automated blood collection system through the blood center's local area network. It captures, stores, and evaluates data from each Trima Accel collection. The staff interacts with Vista through desktop or laptop computers as well as bar code scanners on the Trima Accel device. Vista provides the following functions through the connection with the Trima Accel device: identifies the optimal collection for each donor; tracks and manages blood component loss; automates the creation of procedure records; facilitates instant procedure priority updates on multiple Trima Accel devices; and improves and standardizes processes. Vista is cleared by the Food and Drug Administration (FDA).

Personally Identifiable Information (PII) collected includes employee and beneficiary contact information, demographic information, and Protected Health Information (PHI). The categories of individuals with records in this system include DoD health care beneficiaries and members of the public who donate blood at these blood centers.

Vista Information System is owned by DHA's CyberLOG and operated by various Military Treatment Facilities (MTFs).

d. Why is the PII collected and/or what is the intended use of the PII? (e.g., verification, identification, authentication, data matching, mission-related use, administrative use)

The PII collected is used for mission-related purposes to support the delivery of health care services, identification purposes to match individuals with their medical records and to ensure accuracy when records are integrated with other records for the same individual.

e. Do individuals have the opportunity to object to the collection of their PII? Yes No

(1) If "Yes," describe the method by which individuals can object to the collection of PII.

(2) If "No," state the reason why individuals cannot object to the collection of PII.

Individuals are provided a copy of the Armed Services Blood Program (ASBP) Form 572, Blood Donation Record, collection of their PII is voluntary, however, failure to provide required information results in the individual being ineligible to donate blood at that time.

f. Do individuals have the opportunity to consent to the specific uses of their PII? Yes No

(1) If "Yes," describe the method by which individuals can give or withhold their consent.

(2) If "No," state the reason why individuals cannot give or withhold their consent.

Individuals consent to the specific uses of their PII by signing the ASBP 572. Failure to consent to the specific uses of their PII results in the individual being ineligible to donate blood at that time.

g. When an individual is asked to provide PII, a Privacy Act Statement (PAS) and/or a Privacy Advisory must be provided. (Check as appropriate and provide the actual wording.)
