c. Describe the purpose of this DoD information system or electronic collection and describe the types of personal information about individuals collected in the system.

The VersaTrak Monitoring System monitors critical devices for temperature, humidity, pressure or other critical metrics. It is deployed as the primary monitoring system for critical refrigerated storage of all Blood Products for United States Army Europe (USAEUR) bases. VersaTrak is the primary monitoring system for the Army Temperature Sensitive Medical Products (TSMP) program that includes all refrigerated storage for Vaccines (COVID, flu, etc.) and tissue samples across Europe.

The personally identifiable information (PII) is from federal employees such as active duty members, federal civilians/contractors and local nationals. The names, DoD ID numbers of individuals identified as VersaTrak users', along with work/personal email addresses and home/cell/work phone numbers are stored so they can be used to direct alarm notifications via these modalities.

Cybersecurity Logistics (CyberLOG) is responsible for the Risk Management Framework (RMF) process, and gaining an approval from Defense Health Agency (DHA) J6 Risk Management Executive Division (RMED). Local sites are responsible for day to day operations, maintenance, and management of the device. Sites are responsible for ensuring the device is configured to meet CyberLOG and RMED approved configurations.

Versatrak Monitoring System is owned and operated by DHA Landstuhl Regional Medical Center (LRMC).

d. Why is the PII collected and/or what is the intended use of the PII? (e.g., verification, identification, authentication, data matching, mission-related use, administrative use)
