c. Describe the purpose of this DoD information system or electronic collection and describe the types of personal information about individuals collected in the system.

GEHC LOGIQ™ E10 is a professional diagnostic Ultrasound System which transmits Ultrasound waves into body tissues and forms images from the information contained within the received echoes. LOGIQ™ E10 system is a full-featured Track 3 ultrasound system, primarily for general imaging use, including abdominal, vascular, obstetric, gynecologic, neonatal, pediatric, urological, transcranial, cardiac and small parts applications. It consists of a mobile console with keyboard control panel; color LCD/TFT touch panel, color video display, image storage, and optional printing devices. It provides high performance ultrasound imaging and analysis and has comprehensive networking and DICOM capability. It utilizes a variety of linear, curved linear, matrix phased array transducers including mechanical and electronic scanning transducers, which provide highly accurate real-time three-dimensional imaging supporting all standard acquisition modes.

Copy of images to personally identifiable information (PII) and protected health information (PHI) private anonymous archive is available. Private data can be removed and replaced. Display of patient information on main screen can be disabled. Display of PII, PHI about individuals is self-contained on standalone machine or to DICOM PACS.

The categories of individuals with records in this system are DoD health care beneficiaries to include Military members of the Armed Forces, Military retirees, and their family members; DoD Civilian employees; Foreign Nationals; members of the U.S. Coast Guard and Public Health Service; cadets and midshipmen of the military academies; and other categories of individuals who receive medical treatment at DoD treatment facilities/activities.

PII, PHI elements are as follows: Name, Date of Birth, Gender, Date of Admission, Date of Discharge, Medical Record Number, and Device Identifier.

d. Why is the PII collected and/or what is the intended use of the PII? (e.g., verification, identification, authentication, data matching, mission-related use, administrative use)

The PII collected will be used to match an individual with his/her medical diagnostic reports and to ensure accuracy when these reports are integrated in the medical records for that individual.

The PII collected will be used for mission-related purposes to support the delivery of health care services.

The PII in this system is obtained through an interface with the General Electric Health Care (GEHC) Logiq E10 System and then annotated on the patient's diagnostic images. The site may purge the PII after the patient's diagnostic images with associated PII are transferred to a Picture Archive and Communication System (PACS) which stores and provides easy and secure access to the images.

e. Do individuals have the opportunity to object to the collection of their PII?

Yes No

(1) If "Yes," describe the method by which individuals can object to the collection of PII.

(2) If "No," state the reason why individuals cannot object to the collection of PII.

This system is not the initial collection point for the PII. Therefore, individuals do not have the opportunity to object to the collection of their PII.

f. Do individuals have the opportunity to consent to the specific uses of their PII? Yes No

(1) If "Yes," describe the method by which individuals can give or withhold their consent.

(2) If "No," state the reason why individuals cannot give or withhold their consent.

This system is not the initial collection point for the PII. Therefore, individuals do not have the opportunity to consent to specific uses of their PII.

g. When an individual is asked to provide PII, a Privacy Act Statement (PAS) and/or a Privacy Advisory must be provided. (Check as appropriate and provide the actual wording.)

Privacy Act Statement Privacy Advisory Not Applicable

This system is not the initial collection point for the PII. The PII is obtained from an existing DoD information system.
