ScImage PICOM Enterprise PACS (PICOM) is a turnkey hardware and software solution providing Enterprise Radiology and/or Cardiology and/or Other 'ologies Picture Archiving and Communications System (PACS) functionality for on-premise, virtual, and tele-medicine configurations. It is implemented using government-approved physical and/or virtual machine platforms and provides standard PACS features enabling the acquisition, storage, management, diagnostic viewing, reporting, and result distribution of DICOM and NON-DICOM medical imaging studies as well as advanced tool sets for image exchange and interoperability. The PICOM Enterprise Cardiology module provides native ECG Management and integrated Hemodynamics monitoring and reporting. Native HL7 services are available to receive orders from and send reports to an existing EHR or Ordering System. PICOM Enterprise has validated ORM, ADT, and ORU including encoded PDF results with MHS Genesis using HL7 over TLS 1.2 protocols with AES256. DICOM Image acquisition can have its quality checked against established orders and managed accordingly. NON-DICOM Image acquisition, such as XML-PDF from ECG, Stress, or Holter can also have its quality checked against established orders and managed accordingly.

Personally Identifiable Information (PII) and Protected health Information (PHI) collected in this system include: Name, Patient ID, Study Accession Number, Citizenship, Legal Status, Gender, Race/Ethnicity, Date of Birth, Place of Birth, Phone Numbers, Addresses, Marital Status, and Emergency Contact Information.
