c. Describe the purpose of this DoD information system or electronic collection and describe the types of personal information about individuals collected in the system.

The I2 R3 electronically bridges documentation of healthcare delivery in the "Theater of Conflict" to the sustaining base, captures clinical information and other data and passes it to the Theater Medical Data Store (TMDS), where it can be viewed by users all over the world. Data is sent to repositories for enterprise use by Military Health System (MHS) stakeholders. I2 R3 contains protected health information (PHI) and personally identifiable information (PII), consist of custom of the shelf (COTS) and government of the shelf (GOTS) and custom coded software components.

The system collects the following PII and PHI about individuals. PII/PHI is collected to determine eligibility and administer health care delivery services. User data, which contains some PII and PHI, is collected to support administration and clinical practice authorization and access. Clinical patient data is documented and stored in the patient files. Data is used for patient care management.

Personally identifiable information (PII) and protected health information (PHI) collected includes: personal descriptors, ethnicity, contact information, identification numbers, life, education, employment, financial, social security number, and health information.

Categories of individuals about whom the Personally Identifiable Information (PII) and Protected Health Information (PHI) is collected for the system/electronic collection include active duty military (all services + Coast Guard and Reserve), veterans, dependents, retirees and/or their dependents, contractors, foreign nationals, former spouses, reservist, National Guard personnel, and prisoners of war.

The TMIP-J I2 R3 system is located at Military Treatment Facilities close to combat zones where the system is used to support force health protection, casualty care and detainee care. The TMIP-J I2 R3 application is used on Hospital Ships to support force health protection, casualty care and provide humanitarian assistance. TMIP-J I2 R3 is accessed at these locations by users affiliated with the Department of Defense Health Agency. TMIP-J I2 R3 is installed, and managed by the component military service personnel responsible for the facility and supported, and owned by the Joint Operational Medical System (JOMIS) Program Management Office (PMO).

d. Why is the PII collected and/or what is the intended use of the PII? (e.g., verification, identification, authentication, data matching, mission-related use, administrative use)

PII/PHI is collected to determine eligibility and administer health care delivery services. Data is used for patient care management; administer health care delivery services, support the functions of patient contact, correct identification of patients, patient tracking, etc. User data is collected to support administration and clinical practice authorization and access.

e. Do individuals have the opportunity to object to the collection of their PII? Yes No
