c. Describe the purpose of this DoD information system or electronic collection and describe the types of personal information about individuals collected in the system.

DHA Enterprise Fax-BISCOM (FAX-BISCOM) is a complete secure enterprise FOIP (Fax over IP) solution (eMASS ID: 3942). It integrates with Active Directory and requires CAC access on the Lexmark MFD's to send/receive faxes. The system consists of four servers which communicates with various models of Lexmark MFD's throughout the facility. In essence, a user would logon to the Lexmark MFD using their CAC, and then proceed to send or pick up a fax. The GUI and interface between the Lexmark MFD's are controlled and configured on the Kofax servers and then sent to the Queues to be processed. The final server is the Job Tracking server which tracks fax traffic and allows reports to be generated.

Personally Identifiable Information (PII) may be collected or disseminated by DHA Enterprise FAX-BISCOM. PII includes employee and beneficiary contact information, military information, demographic information, and Protected Health Information (PHI).

d. Why is the PII collected and/or what is the intended use of the PII? (e.g., verification, identification, authentication, data matching, mission-related use, administrative use)

PII may be collected or disseminated by FAX-BISCOM when sending and receiving faxes

e. Do individuals have the opportunity to object to the collection of their PII? Yes No

(1) If "Yes," describe the method by which individuals can object to the collection of PII.

(2) If "No," state the reason why individuals cannot object to the collection of PII.
