

## Deployment Medication Analysis & Reporting Tool (DMART)

# Report Tool Overview

- Medication profile snapshot for deploying Service Members (SM)
  - Pre-deployment medication screening
  - Identification of high-risk SMs
  - Assists in identification of SMs who may require waiver
- Menu-driven, Microsoft Access database with look-up features and reports
- Data sourced from Pharmacy Data Transaction Service (PDTs), all DoD Pharmacy points of service
- Report turn-around 24 – 72 hours, 3-5 business days

# Deployment MART Homepage

The DMART homepage displays a menu of available reports, described in detail over the next several slides.

A screenshot of a web browser window displaying the DMART Main Menu. The browser's address bar shows "DMART | Deployment Medication Analysis And Reporting Tool - Main Menu". The page has a dark blue header with the text "SITE MTF" in white. Below the header, there is a white box on the left containing the "DMART" logo in large blue letters, followed by "Deployment Medication Analysis &amp; Reporting Tool" in smaller blue text. Below this box, a dark blue footer contains the text "Version 1.0 • January 2020" and "Subject to the Privacy Act of 1974 (PL 93-579)". To the right of the white box is a list of menu items, each with a small square checkbox: "About This Program", "Patient Medication Profiles", "Utilization by Drug", "Master Reports Selection", and "Details/Admin Settings". At the bottom right of the menu area is a button labeled "Exit This Application". A dark blue footer at the very bottom of the page contains the text "A Service Provided by The DHA Pharmacy Operations Support Contract • San Antonio • Texas".

# About This Program

New in January 2020, the DMART reports Deployment Limiting Health Condition Medications – those that may require a waiver, special handling, routine monitoring, or time for dose stabilization as well as injectables and controlled substances.

As in previous MART tools, this one also reports Controlled Substances and Chronic meds. Chronic meds may also be identified as DLHC but include those for BP, glaucoma, cholesterol control, etc.

Non-deployment meds include those drugs not available on the CENTCOM formulary that may be obtained through the mail order program (MOP) while in theater. The MOP is the highly successful refill method of choice for deploying SMs. While SRP providers are encouraged to use medications available on the CENTCOM formulary, often SMs are stabilized on particular drugs and should not be switched.

DMART | Deployment Medication Analysis And Reporting Tool - About

## DMART | Deployment Medication Analysis And Reporting Tool

This program was developed to aid healthcare providers responsible for the medical care of deploying service men and women. The intent is to identify individuals who might require a more intensive medical review or to alert healthcare providers of medication needs not available in standard deployment packs.

New report as of January 2020.

Deployment Limiting Health Condition (DLHC) medications that may require the service member to receive a waiver before deployment. Medications that require routine monitoring, or a period of time for dose stabilization are included, as are injectables, controlled substances, and medications that need special handling or storage.

Controlled substances are those medications categorized by the federal government as having a higher potential for abuse or addiction. The included drugs are designated as Schedule II - V according to their medical use, potential for abuse, and safety or dependence liability.

Chronic medications, often referred to as maintenance medications, are those drugs taken on a routine bases and when not provided, have the potential for therapeutic failure.

This database contains Privacy Act information and is subject to criminal, civil and/or administrative penalties to those who willfully misuse this information and violate a person's rights under the Privacy Act. This information was provided pursuant a request from the Senior Medical Officer of this deploying unit. Reasonable and necessary security should be in place to protect this data from unauthorized users.

This program was developed by the DHA Pharmacy Operations Division, DHA POSC. Please send any comments or suggestions to us at [dha.jbsa.pharmacy-ops.mbx.pass-dmt@mail.mil](mailto:dha.jbsa.pharmacy-ops.mbx.pass-dmt@mail.mil) or call 866-275-4732 and press option 1.

# Patient Medication Profiles

The Patient Medication Profiles button located on the homepage allows providers to generate a snapshot of a SM's complete drug profile (Rxs dispensed at the MTF, retail, and mail order) over the time period requested for the report. Prescription information includes drug name, drug classification, quantity, date filled and days supply as well as information regarding the drug's inclusion on various formularies. After reviewing the individual profile, if the provider determines the SM needs further follow up, the provider can check "Add to Surgeon's Recall Roster", a separate report that identifies all individuals on the recall roster. If the alpha roster is broken down by individual units, the report can also filter per unit.

# Utilization by Drug

This report allows the provider to list by name SMs within the unit who are on a specific drug. It may assist the provider in identifying those SMs on a particular drug of interest or who may require a waiver.

# User Defined Combination Report

For this example, we used alprazolam, oxycodone and simvastatin. One SM is identified on this combination for this time frame.

Information includes the drug, pharmacy point of service, quantity, days supply, and date filled.

## *Drug Combination Report*

*Data current as of 6/3/2009*

*Date Range: 12/5/2009 - 6/1/2009*

*Service Members with Prescriptions for ALPRAZOLAM, OXYCODONE HCL, and SIMVASTATIN*

SAILOR, NAVY

# Controlled Substance Details

The Details report (vs Summary Reports) lists medications and SMs on those drugs during the requested time period. Information on this report includes drug name, whether the drug is available on the selected formulary, last filled date, quantity, and days supply. The date in top right corner shows when the DMART data was obtained.

*DEERS ID:* 2222222222

Unavailable Med:

OTC

fexofenadine HCl 180 MG TABLET

Some medications are not available through the mail order program; most are OTCs or temperature-sensitive. This list will help the provider/pharmacy to identify medications that may require adequate refills from the SRP pharmacy while the SM is in theater or alert the SM to change medication to something available through the mail order pharmacy.

# Your DMART Statistics

Medication Use Statistics summarizes the numbers and percentages of SMs and prescriptions for various drug categories.

<b><i>Medication Use Statistics</i></b>		<b><i>Date Range: 7/1/2019 - 12/31/2019</i></b>	
<i>Personal Data - Privacy Act of 1974 (PL 93-579)</i>			
Current number of Service Members:	<b>20</b>	Total number of SMs in database (for reference):	<b>20</b>
Current Number of Prescriptions:	<b>35</b>	Total number of Rxs in database (for reference):	<b>35</b>
Current Number of Service Members with Prescriptions:	<b>9 45.0%</b>		
The below statistics are all subject to available filtering. If you have deselected units or changed the reporting date range on the previous window (Details/Admin window), the counts below will report within these restrictions. The percentages below use Current Number of Service Members/Prescriptions as the denominator.			
	<b>Number of RXs</b>	<b>Number of SMs on at least one:</b>

# How To Order DMART Report?

- Contact via COMM 210-536-6650 or email [dha.jbsa.pharmacy-ops.mbx.pass-dmt@mail.mil](mailto:dha.jbsa.pharmacy-ops.mbx.pass-dmt@mail.mil)
- Provide Unit Alpha Roster as directed by receiving analyst
- Complete Sensitive Data Request Form
- Located at: [www.health.mil/DMART](http://www.health.mil/DMART)

# Sensitive Data Request Form

Due to the sensitive medical information supplied in the DMART, we request a Sensitive Data Request Form signed by the unit healthcare provider or in their absence, the unit's Commander. Please send the Sensitive Data Request Form to [dha.jbsa.pharmacy-ops.mbx.pass-dmt@mail.mil](mailto:dha.jbsa.pharmacy-ops.mbx.pass-dmt@mail.mil). A team member will contact you and provide instructions on secure transmission of your roster.

- Please plan for your roster to include:
- a. Last Name, First Name & Middle Initial
  - b. Rank/Rate
  - c. DoD ID (also known as DEERS or EDI\_PN)
  - d. Unit Name/Location (any other information (Unit, UIC, Battalion, etc.) for filtering options.
