Subject:

2024-2025 Moderna COVID-19 mRNA vaccines Ordering Guidance

Reason / Information:

The US Army Medical Materiel Agency Distribution Operations Center (USAMMA DOC) in conjunction with Defense Health Agency Medical Logistics (DHA MEDLOG) are providing ordering guidance for 2024-2025 Moderna COVID-19 mRNA vaccine. REASON: On 22 August 2024, the U.S. Food and Drug Administration approved and granted emergency use authorization (EUA) for updated mRNA COVID-19 vaccines (2024-2025 formula) to include a monovalent (single) component that corresponds to the Omicron variant KP.2 strain of SARS-CoV-2. The updated mRNA COVID-19 vaccine includes Spikevax, licensed by the FDA, which is approved for individuals 12 years of age and older.

Disposition / Instructions:

ACTIONS NEEDED:

1) Medical Treatment Facilities (MTFs) and vaccination sites can begin submitting orders through Pharmacy Prime Vendor (PPV) program with Cencora (formerly known as AmerisourceBergen) for the 2024-2025 Moderna COVID-19 mRNA vaccine using their normal Defense Logistics Medical Standard Support (DMLSS)/Theater Enterprise-Wide Logistics System (TEWLS) ordering process for prime vendor (PV) ordering by setting the source of supply (SOS) to PVP for any of the national drug codes (NDC) listed below. Below are some ordering reminders:

----- COVID-19 Vaccines are no longer free issued item. Coordinate with your financial team to ensure funding is available for the purchasing of the vaccine.

----- MTFs submitting COVID orders within FY25 should tag all 2024-2025 COVID-19

vaccine purchases with FCA Code 4873.

----- COVID-19 vaccines will not be tracked within the DMLSS Assemblage Management module.

2) CONUS PVP Customers, when ordering/receiving COVID-19 vaccines remember the following:

----- Moderna vaccines will ship frozen at -20C, with a shelf-life as indicated on the manufacturer/FDA label.

----- Reminder, the Prime Vendor (PV) will not have temperature monitoring devices in their shippers, they will be using a pre-qualified frozen (-20C) shipper.

----- Store vaccine at -20C to obtain full shelf-life or store at 2C to 8C for 60 days.

----- Redistributions are only recommended by the Manufacturer to be done in a frozen/solid (-20C) state, due to immeasurable shock/sheer/vibration risks.

3) OCONUS PVP Customers when ordering/receiving COVID-19 vaccines remember the following:

----- PVP will be using their standard FedEx Priority Alert contract and transit times.

----- Shipping schedules will follow the standard supply lanes for all Pharm PV cold chain shipments, based on the end destination city and country.

----- Material will ship in DLA's (PVP's) standard frozen (-20C) shipper, to include a Purple-labeled Sensitech TempTale.

----- Customers will follow the same standard receiving process as all other Pharm PV Cold Chain shipments.

----- It is estimated that DLA Troop Support Cold Chain will continue to send pre-alert emails for this next year; after that, customers will receive the PV's standard automated shipping alerts.

NOTE: OCONUS sites are encouraged to order Spikevax vaccine for their adult population as one of two alternatives while the shipping lanes are being established for the Comirnaty, Never Frozen (NF), Vaccine.

4) Navy Fleet assets will order by placing MilStrip orders directly with DLA to utilize the Direct Vendor Delivery (DVD) program, as currently done for all other non-DLA depot stocked vaccines. The Fleet Prime Vendor program will not support COVID vaccine requirements.

5) Non-Pharm PV customers will be expected to order through their Theater Lead Agent for Medical Materiel (TLAMM), which is the standard SOS for most vaccines, or they may also utilize the DLA DVD program.

6) MTFs with questions or concerns related to the DLA Cold Chain program and/or product quality should continue to contact the DLA Troop Support Cold Chain program office, per the terms of the PVP contract. Any questions or concerns related to the PVP program and/or product availability/information should continue to contact their Cencora DoD Customer Care Representative.

7) Listed below you will find the prime vendor ordering number (PVON) for both CONUS and OCONUS. Please ensure the correct PVON is used upon ordering. Incorrect codes may result in orders being canceled.

Item Information:

NSN (FSC-NIIN): 6505 - 017233389
