

WASHINGTON, DC 20301-1200

HEALTH AFFAIRS

The Honorable Daniel K. Inouye Chairman, Committee on Appropriations United States Senate Washington, DC 20510

SEP 11 2009

Dear Mr. Chairman:

This letter responds to the request in House Report 111-230 of the Committee on Appropriations for a report to the congressional defense committees by August 30, 2009, on the status of pharmaceutical rebates that have been collected in TRICARE's retail pharmacy program The TRICARE Management Activity has received in fiscal year 2009 refunds based on Federal Ceiling Prices for retail pharmaceutical prescriptions. These refunds have been credited to the Defense Health Program and Medicare Eligible Retiree Health Care Fund accounts. Additional refunds under this program may continue to be received throughout the remainder of fiscal year 2009. The amount of refunds to be received in fiscal year 2010 is dependent on a number of factors, including the outcome of ongoing litigation with the pharmaceutical manufactures.

The enclosed report provides information regarding the current amount of fiscal year 2009 refunds, the status of implementing the retail pharmacy Federal Ceiling Price legislation, and the projected range of refunds anticipated in fiscal year 2010.

Thank you for your continued support of the Military Health System.

Sincerely,

Ellen P. Embrey

Deputy Assistant Secretary of Defense (Force Health Protection and Readiness)

REPORT ON STATUS OF IMPLEMENTATION OF FEDERAL CEILING PRICE LEGISLATION

AUGUST 2009

This report to the Congressional Defense Committees is in response to the request contained in H. Rept. 111-230, Report of the Committee on Appropriations to accompany H.R. 3326, the Department of Defense Appropriations Bill, 2010, filed July 24, 2009.

Executive Summary.

The Committee wants to determine whether the \$761 million savings in the President's Budget for TRICARE retail pharmacy Federal Ceiling Price implementation will be realized or whether current circumstances suggest a shortfall that Congress should consider addressing through an increased appropriation. As explained below, a conclusive answer is not possible at this time due to pending litigation. However, if there is no litigation outcome adversely affecting DoD's implementation of the retail Federal Ceiling Price statute, the projected FY-2010 savings should be realized.

Background.

The Committee Report noted (page 13) the addition of \$760,716,000 to the Defense Health Program appropriation for FY 2010 based on "Federal Pricing Rebates." As additional explanation (page 14), the Report stated:

PRIVATE SECTOR CARE SHORTFALL

The Committee has been briefed on the funding shortfall that exists in the fiscal year 2009 Private Sector Care Budget Activity Group (BAG) for which the Department is using allowed operation and maintenance carryover and prior approval reprogramming authority to correct. The Committee has been made aware of a similar shortfall in fiscal year 2010. The shortfall is due to a workload increase for the Army, increased usage by Active Duty, Reserve Components and their dependents, in conjunction with the current economic situation and the lack of pharmaceutical rebates collected by the Department for federal pricing. The beneficiary population for TRICARE is currently 9.5 million beneficiaries while the budget is based on a 9.2 million beneficiary population. Therefore, the Committee has provided an additional \$1,281,716,000 to the Private Sector Care BAG to help alleviate the shortfall in anticipation of the Department collecting the \$1,000,000,000 in rebates that are currently owed. The Committee directs the Secretary of Defense to report to the congressional defense committees by August 30, 2009, on the status of additional rebates that have been collected. (Emphasis added.)

Statutory and Regulatory Authority.

Section 703 of the National Defense Authorization Act for Fiscal Year 2008 enacted 10 U.S.C 1074g(f), which provides:

(f) Procurement of pharmaceuticals by TRICARE retail pharmacy program. With respect to any prescription filled on or after the date of the enactment of the National Defense Authorization Act for Fiscal Year 2008 [January 28, 2008], the TRICARE retail pharmacy program shall be treated as an element of the Department of Defense for purposes of the procurement of drugs by Federal agencies under section 8126 of title 38 to the extent necessary to ensure that pharmaceuticals paid for by the Department of Defense that are provided by pharmacies under the program to eligible covered beneficiaries under this section are subject to the pricing standards in such section 8126.

The effect of this law is that for all prescriptions filled on or after January 28, 2008, all covered drug TRICARE Retail Pharmacy Network prescriptions are subject to Federal Ceiling Prices (FCPs). After a period for public comments under the rule making process of the Administrative Procedure Act, DoD implemented this law through the promulgation of a Final Rule (32 C.F.R. § 199.21(q), 74 Federal Register 11,279), published March 17, 2009, and effective May 26, 2009. The two primary provisions of the Final Rule are:

- Pharmaceutical manufacturers are required to sign a written agreement to honor
 FCPs as a condition of eligibility for preferred Tier 2 status on the Uniform
 Formulary (UF) and unrestricted access through retail network pharmacies.
 Consistent with standard commercial practice in the retail pharmacy sector and
 the established TRICARE program of voluntary retail refunds, FCPs are
 implemented through refunds of the amount above FCPs the manufacturer was
 paid when the drugs entered the commercial stream, typically through a sale to
 a distributer.
- For prescriptions not covered by a UF pricing agreement, FCPs still apply under the statute, but collection of the refund is subject to waiver or compromise, including a potential waiver of all collections if the manufacturer withdraws its drug from the TRICARE pharmacy benefits program. Waiver and compromise requests are considered based on the established TRICARE procedures under the Federal Debt Collection Act (32 C.F.R. § 199.11), which generally include Justice Department approval to waive or compromise a significant amount.

Status of Implementation of Statute and Final Rule.

Since the effective date of the Final Rule, the status of implementation on these two primary provisions is as follows.

- Agreements with manufacturers have now been signed prospectively covering more than 90% of the dollar value of all potential FCP-based refunds.
 Additional agreements are expected in the coming weeks, which should raise the amount covered well above 90%. The effective dates of these prospective agreements are generally dates in June or July 2009.
- For prescriptions not covered by these agreements, particularly prescriptions
 filled between January 28, 2008, and the May 26, 2009 effective date of the
 Final Rule, most pharmaceutical manufacturers have requested waiver of any
 refunds. No company has requested removal of any of its drugs from
 TRICARE Pharmacy Benefits Program coverage. The waiver requests that
 have been submitted are pending review.

Litigation Pending.

Also pending is litigation initiated by pharmaceutical manufacturers, acting through an association called The Coalition for Common Sense in Government Procurement. This litigation seeks to invalidate the Final Rule and obtain a Court order prohibiting DoD from collecting any refunds whatsoever. The government's answer in the litigation is to defend all provisions of the Final Rule. This case is pending in the United States District Court for the District of Columbia. A decision from the Court is expected before the end of the calendar year (although appeals or other circumstances could defer a conclusive resolution).

Current Budget Projections.

In the Preamble to the Final Rule, DoD reported that the FY-2009 budget approved by the President and Congress incorporated FCP savings of \$352 million in the Defense Health Program appropriation. In FY-2010, the President's Budget projected \$761 million in reduced spending from the Defense Health Program appropriation (and an additional \$910 million in reduced spending from the Medicare-Eligible Retiree Health Care Fund).

In making projections such as these, it should be noted that there is a two quarter delay between prescriptions being filled and refunds collected. Thus, for example, the \$761 million savings for FY-2010 (refunds received during FY-2010) relates to

prescriptions filled in the retail pharmacy network between April 1, 2009 and March 30, 2010. DoD projected that applying FCPs to all of these prescriptions would produce budget savings (in the form of refunds credited to the DHP appropriation) of \$761 million.

In FY-2009, the full amount of projected savings was not realized due to the delay in completing the rule making process. The resulting Defense Health Program appropriation shortfall was resolved by supplemental appropriations from Congress.

Conclusion.

Total

The following tables summarize:

• Refunds actually received in FY-2009.

Medicare-Eligible Retiree Health Care Fund (MERHCF)

- Projected refunds for FY-2010.
- A range of additional, possible, one-time FY-2010 refunds, depending on adjudication of waiver/compromise requests and possible further litigation.

\$872,850,000

\$1,587,000,000

FY-09 Refunds Actually Received (As of 4 August)	\$122.012.625.02
Defense Health Program (DHP)	\$133,012,635.02
Medicare-Eligible Retiree Health Care Fund (MERHCF)	\$162,570,998.36
Total	\$295,583,633.38

DEFENSE HEALTH PROC

The Department of Defense able the Services to receive returned to the Military Transites is concerned that the executing the efficiency we not accurately budgeting for only used a small portion Care Budget Activity Group ity of the funding to other military construction. This do by the Navy and Air Force whealth care for their populat ant Secretary of Defense for not the efficiency wedge shreimbursement in fiscal year retary of Defense for Health of this review within 30 days

of this review within 30 days. In addition, the Committee review budget execution dat accounts and to adequately requested by the Services in fiscal year 2011 and beyond.

PRIVATE SE

The Committee has been lists in the fiscal year 2005 Group (BAG) for which the and maintenance carryover thority to correct. The Complar shortfall in fiscal year 2 increase for the Army, increase for the Ar

The Committee has provide and maintenance funding for sistant Secretary of Defense spend plan for fiscal year a congressional defense commact. Given the complex nata Committee expects the Def Management and Budget to

the Defense Health Program and coordinate required justification material submitted to Congress.

TRAUMATIC BRAIN INJURY AND PSYCHOLOGICAL HEALTH

Traumatic Brain Injury (TBI) and psychological health issues have emerged as a significant cause of death to the warfighters in Iraq and Afghanistan. Whether mild, moderate or severe brain injury, the level of assessment and standard of care provided to the warfighter is in need of enhancement. Diagnosis, treatment, and rehabilitation must be at a level to ensure the best possible outcome. To this end, the bill includes \$500,000,000, which is \$127,800,000 above the budget request, to address all levels of brain injury and psychological health issues that servicemembers

and their families experience.

The Department provides specialized treatment and rehabilita-tion for brain injured troops, but much more is needed. The Department is expected to continue to provide the necessary care and treatment to servicemembers and their families. The vast majority of disabled troops will ultimately return to their home commu-nities, which may be far removed from specialized centers. Therefore, the identification of local services is crucial to an appropriate rehabilitation plan. The Department of Defense Military Centers and the Department of Veterans Affairs should coordinate with civilian centers to guarantee that optimal treatments and assistance are available throughout the country.

The Department is aware of gaps within TBI and psychological treatment methods that need to be addressed. The Department is expected to continue working with the Department of Veterans Affairs, Department of Health and Human Services, academia and industry to focus on the research and treatment necessary to address

the gaps that have been identified.

An area of particular interest is the provision of appropriate and accessible counseling to servicemembers and their families who live in locations that are not close to military treatment facilities, other Military Health System health facilities or TRICARE providers. Funding provided in this bill is also to be used for the development and operation of the Defense Center of Excellence (DCoE) and the various centers, programs and initiatives that fall within its purview and resources to support the service medical departments as they continue to build and expand their TBI and psychological health capacity through initiatives and supportive programs. Other initiatives, such as telehealth, clinical standards supporting TBI and psychological health, and training and education outreach should also be included.

Funding has also been provided to continue medical research and development on TBI and psychological health. The following research topics are recommended for consideration under this program: therapeutic drug discovery; optical imaging of blood flow; headache disorders; research into neural prothesis; studies of mental health disorders and Post Traumatic Stress Disorder (PTSD) to include neuropsychiatric studies, biochemical mechanisms that underlie human emotional reactions to combat stress and resulting clinical disorders, metrics for mental health assessment and methods to evaluate and improve PTSD rehabilitation efforts; studies of

Traumatic Brain Injury (TB injury treatments, cell repla cific therapies to prevent and traumatic damage, pharmace ral circuits, "activity-based" bilitation focused on impair tioning; clinical research of sulting effects on neurologic waves to develop equipment a fully automated, self conta at the point of onset; DA-EI to allow an accurate assessm to integrate global transcrip indentify the biological netw PTSD and/or TBI including the integration of informat search to analyze brain tissu neuroimaging, behavioral an markers, diagnostics, and tre jury stages. Funding provide incorporate all aspects of res logical health by conducting search for the purposes of u preventive interventions and outcomes to arrive at best-p cludes incorporating training ployment evidence-based pre ures, practices, or procedure sonnel in combat will develo tions or sustain traumatic br

The Committee is aware June 30, 2009, the Defense Health and Traumatic Brai \$345,474.68. > DEPARTMENT OF DEFENSI ENTERPRISE A

The fiscal year 2010 budge tion management and inform been involved in developmen (EHR) in conjunction with th since January 2009 and has tecture (SOA) approach that health care and has inclusive interoperability between the two agencies. A blueprint for the SOA was finalized at the end of May 2009 and submitted to the Office of the Secretary of Defense, Comptroller for review and funding analysis on June 12, 2009. It is the Committee's understanding that the additional funding needed to accelerate completion and deployment of the SOA in 28 months, by February 2011, is \$712,500,000 for fiscal year 2010 and

\$441,700,000 for fiscal year 2011.

The Department of Health and Human Services was provided funding in the stimulus package for electronic health care record improvement across the civilian sector. The Committee is concerned that the Department of Defense may now lag behind the civilian entities and its ability to share electronic information with the VA. The Committee also understands that the Under Secretary of Defense, Comptroller is currently reviewing internally what funds may be available to alleviate the unfunded requirement in order to accelerate deployment of the system. Therefore, the Committee directs the Secretary of Defense to report to the Committees on Appropriations of the House of Representatives and the Senate by September 14, 2009 on the status of availability of funding from programs within the Department of Defense.

GUIDANCE FOR THE DEVELOPMENT OF THE FORCE (2010-2015)

The fiscal year 2010 budget submission included \$372,200,000 for traumatic brain injury, psychological health, eye injury, prosthetics, and other battlefield injuries research. The Committee has supported these types of research since 2007 and is encouraged that the Department has for the first time included funding for this type of research. The Committee urges the Department to utilize the established congressional directed medical research program and to work with the U.S. Army Medical Research and Materiel Command in finding the most efficient way of utilizing the unique and military relevant research available.

SPINAL CORD INJURY MEDICAL RESEARCH AND TREATMENT

Spinal cord injuries are one of the many serious wounds resulting from conflicts in Iraq and Afghanistan that require many levels of research and treatment. Significant funding has been provided for research and treatment for neuro-traumatic wounds. However, given the complexity of these types of injuries and the steep learning curve associated with establishing effective treatment regimes, there is much more to be done.

For the coming years, research into regenerating damaged spinal cords, arthritis research, and improving rehabilitation therapies offers real promise for enhancing the long-term care of wounded soldiers. Therefore, the Committee provides \$15,000,000 to continue a competitive, peer-reviewed spinal cord injury research and treatment program. The Secretary of Defense is directed to submit a report to the congressional defense committees not later than 120 days after enactment of this Act on how these funds are to be allocated.

PEER-REVIEWED

The Committee has includ cancer research. Lung cancer cancers, taking more lives a combined. The five year su major contributor is that 70 printhermore, military personancer carcinogens and are than the general population funds provided in fiscal year tion program for military bearly detection regimen will Medical Treatment facilities.

CENTERS OF EXCE

The Committee includes a Centers of Excellence at th Center: Breast Care, Gyneco and Integrated Cardiac Hea the forefront of the advancen

It is encouraging that the tance of these centers to the their families and has included the new Walter Reed Nation vided a portion of funding it sion. However, the Committed include full funding for these 2011 budget submission.

PEER-REVIEWED

The Committee provides a research program that would breast, prostate, lung and crently executed by the Depa U.S. Army Medical Research

The funds provided are d in the following areas: mela brain tumors within the fie cancer research and genomi colorectal cancer, Listeria V and radiation protecting uti

The funds provided under Program shall be used only partment of Defense is directly to the congressional open-reviewed cancer reseat type of research for services.

The Committee commentation and maintenance fun however, the Department for vision research and described to the commentation of the committee comments and described to the comments and d

technologies and therapies to address the ocular issues of servicemembers. Current research targets the causes, effects, and treatment of eye damage and diseases that, despite their different mechanisms and pathogenesis, all have a common end result: degeneration of the critical components of the eye and impairment or loss of vision. In order to implement therapeutic strategies to prevent or treat visual problems common to combat soldiers, the Army needs to develop and validate compounds and strategies. Therefore, the Committee provides \$5,000,000 for vision research and directs the Army to target the various causes, effects and treatment of visual injury resulting from exposures to the elements during combat operations, and damage from explosive devices. This type of research will ultimately be used to ensure and sustain combat readiness.

JOINT PATHOLOGY CENTER

Section 722 of the National Defense Authorization Act of 2008 (Public Law 110-181) directs the Department of Defense to continue maintenance and modernization of the Armed Forces Institute of Pathology Tissue Repository and to utilize the Repository for conducting activities in support of the Joint Pathology Center established in the same Act. The Committee is aware that in 2007 the Uniformed Services University of the Health Sciences commissioned an assessment of the Repository that resulted in specific recommendations for modernizing the Repository by improving the quality and accessibility of the collections contained therein. The Committee directs that within 90 days of enactment of this Act, the Secretary of Defense shall report to the congressional defense committees on the status of implementation of those recommendations.

PEER-REVIEWED NEUROTOXIN EXPOSURE TREATMENT PARKINSON'S RESEARCH PROGRAM

The United States Army Medical Research and Materiel Command (USAMRMC) is advancing research in investigating the underlying biologic mechanisms and therapeutic interventions of neuro-degenerative effects caused by deployment, environmental and occupational exposures. Therefore, \$25,000,000 is recommended for the continuation of this vital research and other neurological disorders through collaborative work between the military, a non-profit organization and an academic laboratory with distinguished scientific credentials in this field.

MEDICAL CARE IN THE NATIONAL CAPITAL REGION

The Committee has expressed concerns over whether the current approach to the replacement hospitals at both the new Walter Reed National Military Medical Center (WRNMMC) and Fort Belvoir will result in "world class" hospitals, but even more so will result in a "world class" medical care system in the National Capital Region. At present there are 439,000 beneficiaries in the region and the two major Military Medical Centers in the area, Walter Reed Army Medical Center and the National Naval Medical Center, are the "flagship" hospitals for their respective services.

growth for the two new fi \$835,000,000 to \$2,400,000,00 WRNMMC, ingress and egress transition of the workforce, p rent facilities to the new hos that currently remain and 1 Force National Capital Regio 14, 2007, has worked diligent prior planning.
