

UNDER SECRETARY OF DEFENSE

4000 DEFENSE PENTAGON
WASHINGTON, DC 20301-4000

PERSONNEL AND
READINESS

MAR 22 2013

The Honorable Carl Levin
Chairman
Committee on Armed Services
United States Senate
Washington, DC 20510

Dear Mr. Chairman:

The National Defense Authorization Act (NDAA) for Fiscal Year 2013, Section 732, required the Secretary of Defense to submit a report on the future availability of TRICARE Prime for eligible beneficiaries in the United States. Policy regarding the TRICARE Prime Service Areas falls under my purview, and I have been asked to respond.

The attached white paper on "TRICARE Prime Service Area (PSA) Reductions" is submitted in response to Section 732. Approximately 171,000 of the 5.4 million TRICARE Prime enrollees will be affected by eliminating the PSAs not built around a Military Treatment Facility or base realignment and closure site. Senior leadership throughout the Military Health System, and the managed care vendors involved, are meeting regularly to monitor this transition and ensure its success. A similar letter is being sent to the Chairman of the House Committee on Armed Services.

Thank you for your interest in the health and well-being of our Service members, veterans, and their families.

Sincerely,

Jessica L. Wright
Acting

WHITE PAPER

TRICARE PRIME SERVICE AREA REDUCTIONS January 10, 2013

Requested by: Section 732, National Defense Authorization Act for
Fiscal Year 2013

The estimated cost of report or study for the Department of Defense is approximately \$300 for the 2013 Fiscal Year. This includes \$0 in expenses and \$300 in DoD labor.

Generated on 2013Feb20 RefID: D-B1F272B

EXECUTIVE SUMMARY:

The following information regarding the planned TRICARE Prime Service Area (PSA) Reduction is provided as required by the National Defense Authorization Act for Fiscal Year (FY) 2013, section 732. The statute required a report regarding the future availability of TRICARE Prime for eligible beneficiaries in all TRICARE regions throughout the United States. The Department will reduce the number of PSAs where it offers the TRICARE Prime managed care option to retirees and their family members on October 1, 2013. This change impacts approximately 171,000 military retired beneficiaries of the total 5.4 million beneficiaries currently enrolled in TRICARE Prime.

Elimination of these PSAs will not change the TRICARE benefit for Active Duty Service members or their families currently living in these locations and enrolled in Prime. They will remain enrolled in Prime, ensuring their access to care and out-of-pocket costs do not change.

BACKGROUND:

PSAs are geographic areas where TRICARE contractors establish networks of health care providers to enable provision of TRICARE Prime, the managed care health plan option. A central feature of TRICARE Prime is that PSAs are established in zip codes within forty miles of a military treatment facility (MTF). PSAs have also been established at Base Realignment and Closure (BRAC) sites. The primary purpose of a PSA is to augment the medical capability and capacity of the MTFs, especially in time of war or humanitarian missions when many MTF providers are deployed.

The managed care support contractors established additional PSAs during the second generation of TRICARE contracts, which the government accepted because, at the time,

TRICARE Prime was projected to be less expensive per capita than TRICARE Standard, the “open choice” health plan option. The new TRICARE Third Generation (T3) contracts require establishing and maintaining PSAs only around MTFs or BRAC sites.

DISCUSSION:

Eliminating non-MTF and non-BRAC PSAs will reduce the cost of administering TRICARE approximately \$45-\$56 million per year, depending on how many military retirees remain in TRICARE Prime by enrolling in another PSA or with one of the six US Family Health Plans (USFHP). The projected savings are based on a TRICARE Prime enrollee’s healthcare cost to the Department being approximately \$600 more per year than the cost of providing TRICARE Standard and the administrative savings involved with establishing and maintaining the PSAs.

The PSAs being eliminated do not augment, and never have augmented, the medical capability and capacity of MTFs. As currently required by the T3 contract, the three managed care support contractors (Health Net Federal Services, Humana Military Healthcare Services, and UnitedHealthcare Military & Veterans Services) will operate PSAs around all MTFs and BRAC sites. A listing by region and state of the MTF and BRAC sites is attached. Also, attached is a chart showing by state the location of the approximately 171,000 enrollees impacted by the elimination of non-MTF and non-BRAC PSAs.

This is not a new proposal nor is it the result of any mandated DoD cuts in spending. The Department planned for this change beginning in 2007 when the request for proposal for the T3 contract was released. That contract required bidders to establish PSAs only at the MTFs and

BRAC sites. The intent was to make PSA reductions in all three regions simultaneously; however, these reductions were delayed due to contract award protests and the subsequent staggered transition to the T3 contract. With the new West Region contract now finalized, PSA reductions can be made simultaneously in all three regions to correspond with the annual Prime enrollment renewal on October 1, 2013.

Impacted military retirees may transfer their Prime enrollment to a more distant PSA if one is available within 100 miles, or to one of the six USFHPs. They will need to submit a new enrollment form, waive the primary and specialty care travel time standards and select a new primary care manager. We will send each of these beneficiaries a detailed letter fully explaining their options and providing a website address and customer service phone number, should they have any questions or need assistance.

Military retirees who are not eligible to enroll in or choose not to enroll in a distant PSA or USFHP are immediately covered by TRICARE Standard, which is similar to "open choice" health plans and the basic entitlement by law. TRICARE Standard gives beneficiaries the most flexibility and greatest choice of providers. No action is required by the impacted beneficiaries to be covered by TRICARE Standard, as their status will automatically be updated in the Defense Enrollment and Eligibility System (DEERS) on October 1, 2013.

While TRICARE Prime requires an annual enrollment fee of \$269.28 per individual or \$538.56 per family, there is not an enrollment fee for TRICARE Standard. Instead, TRICARE Standard has an annual deductible (\$150 per individual or \$300 per family) and a 25 percent cost-share for medical services. A retired family on either plan will pay the same pharmacy copayments and is limited to the same maximum out-of-pocket expense (catastrophic cap) of \$3,000 per fiscal year. TRICARE Standard has been enhanced by eliminating cost-shares for

many preventive services, resulting in some beneficiaries having no out-of-pocket expenses during the year. In 2009, a TRICARE Standard beneficiary paid about \$19.50 more per month in out of pocket expenses than a TRICARE Prime beneficiary.

Monitoring access to care and satisfaction levels for beneficiaries using TRICARE Standard is an ongoing activity by the TRICARE Management Activity (TMA), accomplished by surveying beneficiaries who received outpatient or inpatient care. Annually, TMA determines the number of TRICARE participating providers by reviewing the number of unique providers filing claims. Since FY2006, the number of TRICARE participating providers has risen steadily. TRICARE Standard beneficiaries consistently report very high satisfaction levels with the “plan,” with both the FY2010 (66 percent versus 58 percent) and FY2011 (69 percent versus 56 percent) ratings higher than civilian benchmarks. (The source for the network and satisfaction information is the FY2011 “Evaluation of the TRICARE Program” Report to Congress and the “draft” FY2012 report). An enhancement this year to the TRICARE Standard program is the addition of a TRICARE Standard Provider Directory on the managed care support contractors’ websites. The directory (with a robust search feature) will significantly ease the process of finding healthcare providers currently accepting TRICARE Standard patients.

A detailed Beneficiary Education Plan has been developed, which includes news releases to the media and military associations (attached). Impacted beneficiaries will receive 2 letters in the next 6 months, providing as much advance notice as possible, to fully explain their other health plan options. They will also see continuous updates posted on the www.tricare.mil and other media websites. A summary of the Beneficiary Education and Support Services timeline is attached.

CONCLUSION:

Senior leadership throughout the Military Health System and at the managed care support contractors are all involved and meeting regularly to monitor the progress of the PSA reduction plan.

We are committed to ensuring a smooth transition for all impacted TRICARE Prime beneficiaries.
