Part B: DHA TRICARE Health Plan Network Review

Problem Statement

Request by NDAA 703 Workgroup to provide an assessment of the capability of the purchased care network to absorb clinic workload and enrollment currently being provided at **NBHC Indian Head, MD**

“Medically Ready Force...Ready Medical Force”

Part B: DHA TRICARE Health Plan Network Review

Methodology Overview

- Using MZ/DHA Portfolios workload data, THP quantifies MTF capabilities /capacity/enrollment projected to shift to Purchased Sector Care (PSC) Market
 - Specialty care is defined as a 60-minute drive from physical address to specialist location. Assuming most beneficiaries live on post that are enrolled to the MTF, the network assessments will use 40 miles (urban) and 55 miles (rural) to approximate drive-time.
 - Primary care is defined as a 30-minute drive from physical address to address of PCM location. Assuming most beneficiaries live on post that are enrolled to the MTF, the network assessments will use 15 miles (urban) and 30 miles (rural) to approximate drive-time. PCPs generally have relatively full panels. Assuming the MCSC could contract 50% of the community non-network PCMs within the respective mile radius, an additional empanelment per provider is calculated.
- Utilizing workload data provided by THP, MCSC identifies/quantifies current PSC capabilities/capacity to absorb MTF workload
- THP summarizes ability of PSC to meet the new demand for services projected to shift from the MTF to PSC

Specialty Legend:

- Green:** No anticipated problems meeting workload with ATC standards
- Yellow:** Current or Potential for increased appointment wait time and/or drive time.
- Red:** Anticipate exceeding appointment wait time and/or drive time standards.

Primary Care Legend:

- Green:** Up to 2.5% more enrollees (<49) easily
- Yellow:** 2.5% - 5% (50-99) with moderate difficulty
- Red:** > 5% (100+) with great difficulty

“Medically Ready Force...Ready Medical Force”

Part B: DHA TRICARE Health Plan Network Review

PSC Assessment NBHC Indian Head PSA *Civilian Network Capabilities*

MCSC ASSESSMENT OF CIVILIAN NETWORK CAPABILITIES

- **Primary Care:** Current capabilities: (green). Capabilities with absorbed workload: (green)
- **Mental Health:** Current capabilities: (green). Capabilities with absorbed workload: (yellow)

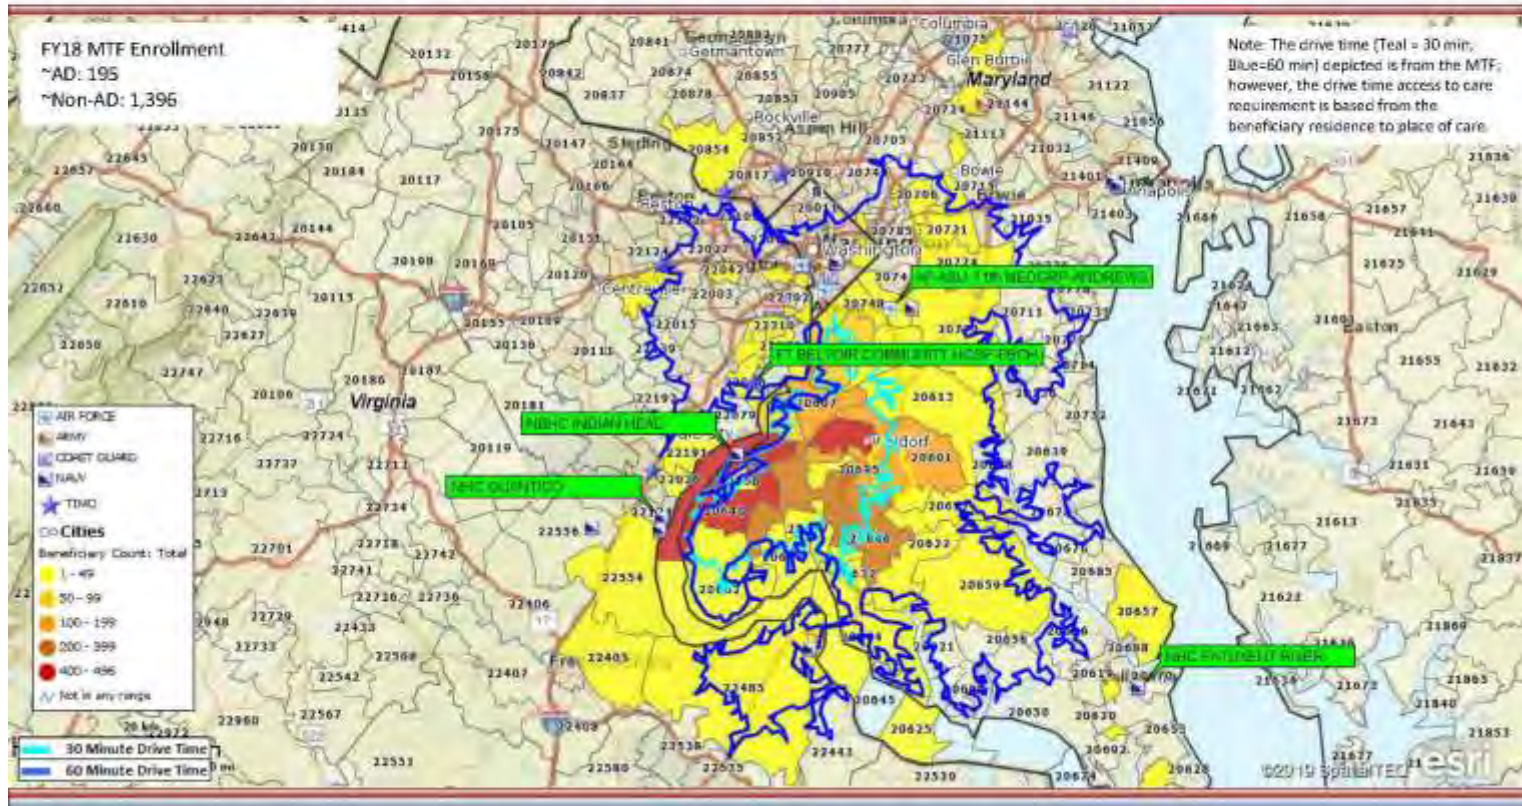

Considerations:

- Within a 15-mile radius of NBHC Indian Head, 135 TRICARE Primary Care Managers (PCMs) are currently accepting new patients. Assuming the MCSC could contract 50% of the 91 non-network PCMs within the 15-mile radius, each PCM would have to empanel 9 beneficiaries.
- There are five network facilities within drive time of NBHC Indian Head that offer like services currently provided by the MTF with more than adequate access to care.
- When shifting workload to the network, a phased approach should be developed.
- Even though there are an adequate number of BH providers contracted, access to care is over 28 days.
- Case managed enrollees should have a warm hand-off to the MCSC.

MHS Section 703 Workgroup Indian Head Network Assessment Discussion

Part C: Network Assessment Detail – Network Insight

Network Assessment: Indian Head (1 of 2)

Scenario: NBHC Indian Head is being evaluated for closure of outpatient / ambulatory clinic

- 99% of MTF Prime, Reliant, and Plus beneficiaries are living within the 30-minute drive-time boundary for Primary Care, concentrated around the MTF location
- 100% of MTF Prime, Reliant, and Medicare Eligible beneficiaries are living within the 60-minute drive-time boundary for Specialty Care, concentrated around the MTF location

Primary Care Impacted Beneficiaries	Within 30-min	Within 60-min	Outside 60-min
MTF Prime ¹	1,805	27	0
Reliant	390	0	0
Plus	132	2	0
Total	2,326	29	0

1: Includes 15 Medicare Eligible MTF Prime beneficiaries

Specialty OP Impacted Beneficiaries	Within 30-min	Within 60-min	Outside 60-min
MTF Prime ²	1,591	43	0
Reliant	390	0	0
Medicare Eligible	456	37	0
Total	2,436	80	0

2: Includes 16 Medicare Eligible MTF Prime beneficiaries

Note: Indian Head radiuses adjusted to account for Potomac river crossings as follows:

- No VA zip codes included in 15-mile radius
- VA zip codes within 25 miles of I-495 crossing included in 40-mile radius
- VA zip codes within 20 miles of US-301 crossing included in 40-mile radius

Note: To estimate the geographic market within a 30-minute, and 60-minute, drive time of the MTF, we assumed an average driving speed of 30 MPH, and thus a 15-mile radius for the 30-minute standard, and a 40 mile radius for the 60-minute standard, around the zip code of the MTF was determined as the geographic market

Network Assessment: Indian Head (2 of 2)

The potential impact of new MHS Beneficiaries on the total population is well below the 10% threshold for both population groups and thus will not materially impact supply and demand of services in the Indian Head market

Indian Head: Network Adequacy Analysis (1 of 4)

Primary Care

Key

- = 15-mile (30-minute) boundary
- = Density of beneficiaries by zip code

- The above geography represents a 15-mile radius, which was used due to this geography being an **urban area**
- The identified drive time **includes 22 zip codes and two partial counties** (*Charles, Prince George's*)
- **Of the 2,355 impacted primary care beneficiaries** attributed to Indian Head, **~99% are represented within the 15-mile radius boundary**

BHC Indian Head

Current Scope / Capabilities

Ambulatory Outpatient Clinic (Mon-Fri)
Services include: Adult Medical HomePort, Integrated Behavioral Health Consultant, Immunizations, Health Promotions, Dental limited ancillary services (pharmacy, radiology, and laboratory), Occupational Health, Industrial Hygiene, and Preventive Medicine services.

POM Cuts/Divestitures

FY 19 Total # billets: 47 (26 AD: 5 Officer/ 21 Enlisted)
Number of AD billets FY 20/21: 7 (19 AD: 2 Officer / 17 Enlisted)
New Baseline: 40
Outpatient Medical billet losses (6); losses will align to 703 WG recommendation.

Dental Clinic Impact: loss of sole General Dentist to POM cuts (1 of 1) leaves 3 support staff with no provider.
Medical POM cuts do not impact Skill Type I provider; however, Use Case assumes TRICARE providers expand from 135 to 181 of the total 232 potentials to enroll new patients and, that they are within 15 mile drive time.

703 WG Recommendation:

Convert BHC Indian outpatient clinic to AD Clinic with Occupational Health.

**The NME Platform Laydown Working Group is realigning billets to meet the 703 Working Group recommendations.

Manpower Requirements Assessment

Based on SMRD staffing tools, MHP staffing for AD only would be within directed standards if non AD population shifts to the network.

From a requirements perspective, 703 recommendations could be executed.
