MDR MEPRS File

I. SOURCE

Data capture system: EAS IV Data Repository as documented in **ICD-1300-2015-04 Approved EAS IV ICD Mod 5** dated 30 May 2013.

II. TRANSMISSION (FORMAT AND FREQUENCY)

Each month DHSS provides raw EAS IV data extracts via FTP as described in the interface control document (ICD) referenced above. The monthly data harvest results from queries run against the EAS IV Repository and includes the following:

Table Name	Description
Workload Detail (Table A-1: ancproc.txt)	Contains ancillary workload by contributing MEPRS4 Code
Expense Detail (Table A-2: expdet.txt)	Contains detailed expense data at Program Element Code (PEC) and Standard Expense Element Code (SEEC) level (Feeds core MEPRS MDR table)
Personnel Detail (Table A-3: fte.txt)	Contains detailed information about MTF personnel
Allocated Expenses (Table A-4: step.txt)	Contains expense data by providing MEPRS4 Code (Feeds Expense Detail Table which is a separate dataset in the MDR)
Facility Summary (Table A-5: sum.txt)	Contains summary MTF workload and expense data (Dispositions, OBDs, Visits, Salaries, etc)
Sites (Table A-7: sites.txt)	List of sites that are sending EAS IV data. File is used to purge records from existing MDR file so that data contained in above extracts can be added.

Feeds are pipe "|" delimited ASCII files.

III. ORGANIZATION AND BATCHING

- EAS IV extracts are received and processed monthly.
- Extracts are organized into Fiscal Year files.

IV. RECEIVING FILTERS

No filters are applied.

V. FIELD TRANSFORMATIONS AND DELETIONS FOR MDR CORE DATABASE

- Each EAS IV extract, except the Sites extract, is processed separately and then all files are merged by Fiscal Year, Fiscal Month, DMISID, MEPRS4 Code, and Reporting DMISID.
- There are numerous internally derived fields, as noted in the transformation notes in the table below.
- Only records updated since the last harvest of data are received.
- Sites extract is used to purge the existing FY file. Records that have been newly received are deleted from existing FY file and new records are appended.

VI. FILE LAYOUT AND CONTENT

The MDR EAS IV file is a SAS Data Set.

VII. REFRESH FREQUENCY

Fiscal Year files for FY01-present are updated monthly if there is a change to the file.

VIII. DIRECTORY LOCATION

For FY01+: /mdr/pub/eas4/fyXX/eas4.fyXX where 'XX' is the two digit fiscal year.

For FY00 and back: /mdr/pub/meqs/fyXX/meqs.fyXX where 'XX' is the two digit fiscal year.

IX. QUALITY ASSURANCE

The processor should conduct monthly quality assurance checks to ensure input and output data are valid, complete, and reliable. At a minimum, the processor should:

- Compare monthly raw data row counts to ensure input personnel detail data are consistent with previous monthly raw data feeds.
- Ensure subtotal data are consistent with equivalent data in M2 and EAS IV Repository.
- Ensure pre-processing data subtotals equal post-processing data subtotals.
- Evaluate post-processing values for data that appear out of the ordinary, or not consistent with SME expected values (face validity).

X. SPECIAL OUTPUTS

See M2 MEPRS specification for layout of MDR feeds to M2.
