**Direct Care Inpatient Admissions / Standard Inpatient Data Record (SIDR) Feed
for the MHS Mart (M2)[1]**

I. <u>File Format</u>:

Regardless of the length specified, all fields are variable length and delimited by "!". A null field will simply have an end of field delimiter "!" immediately following the previous field's end of field delimiter.

This specification (version 2.00.00 and higher) is for updating the M2 Direct Care Inpatient Admissions (SIDR) detail table for FY08 and forward as of October 2013's universe release (at that point the detail table will only contain data for FY08 and forward) which incorporates the process of incorporating inferred inpatient admissions (SIDR)[2]. For information on how previous FYs were updated, see earlier specifications (version 1.11.00 and back).

II. <u>Record Selection</u>:

Batches are by fiscal year. Original batches include all inpatient admissions (CHCS SIDR and MHS GENESIS admissions) with a status of "complete records."

- The following fields were not part of the FY98 SIDR (CHCS only) feed from the MDR: NEDPCM, PCMTYPE, MCPGRP, PRISM, BPACATCH, FULLCOST, BENFCAT1, DMISAGE, ICUDAYS, PRODLINE, RACE, SICKDAYS, Clinical Service Admitting, Clinical Service Second, Clinical Service Third, CLN1DAYS, CLN2DAYS, CLN3DAYS, CLN4DAYS, BASSDAYS, BDAYS1, BEDCIV, BEDOTHER, COOPCARE, MEDHLDAY, QUARDAYS, SUPPCARE, OUTCAT.

III. <u>Refresh Batches</u>:

Batches are by fiscal year. Even an update batch should include the entire fiscal year's records.

IV. <u>MDR Feed to M2</u>:

The table below includes all the fields received or derived in the MDR that are fed to the M2.

Table 1. File Layout and Transformation Rules to Prepare the Feed to go to M2

V. <u>M2-Inferred Fields</u>:

The Inpatient Admissions table as viewed in the M2 includes multiple fields that are not in the feed. These fields result from "joins" to other tables, sometimes with additional math, and are consequently not in the feed. M2-inferred fields are listed in the table below.

Note that for FY14 and back, the Procedure Location and Quantity fields are M2 derived even though they are listed in the table above. This is because beginning with FY15, the fields will be sent on the MDR feed.

This file serves as the input to the MIP Core SIDR/Inpatient Admissions table. In accordance with Technical Data Standards, the data should be made available to users with the same file names, field names and formats as the source data, with underscores replacing spaces in the names, if desired. The MIP core SIDR/Inpatient Admissions table should be updated at the same cadency of the M2 file and row counts should be validated against the MDR Export transmittals.
