

DHA Pediatrics App FACT SHEET

The Defense Health Agency Pediatrics App provides pediatric information for pediatricians and clinicians all in one place for quick access. The app contains resources on pediatric-specific disease guides and standard operating procedures, medical libraries, and clinical practice guidelines. It also contains a conversion calculator, and child advocacy program information.

This app allows pediatricians and other providers who provide pediatric care at locations without specialists to get a quick, "curbside" opinion from a DHA specialist when the clinician needs it.

The app was produced by the **Solution Delivery Division Web & Mobile Technology Program Management Office**. WMT provides web and mobile solutions to the Defense Health Agency within the Department of Defense, and also the Department of Veterans Affairs.
