

The Warfighter Brain Health Provider Toolkit offers easy access to many resources aimed at comprehensive management of patient brain health.

Developed at the request of the Traumatic Brain Injury Center of Excellence (TBICoE), the toolkit contains materials from the Department of Defense and the Department of Veterans Affairs. These include the Military Acute Concussion Evaluation 2 (MACE 2), Progressive Return to Activity protocol, clinical recommendations, and fact sheets for both providers and patients.

This toolkit is managed by the **Solution Delivery Division** Web & Mobile Technology Program Management Office.

Key Features

- Helps clinicians conduct quick and accurate concussion evaluations
- Supports safe return-to-duty processes
- Includes clinical recommendations and assessments
- Available online and offline

Key Benefits

- Consolidates access to trusted brain health resources
- Streamlines diagnostic and management processes
- Supports standardization of care
- Accessible in deployed settings
