<sup>a</sup> Burden of disease major categories and burden of disease-related conditions modified from those defined in Global Burden of Disease Study.<sup>7,8</sup>

<sup>b</sup> Medical encounters include total hospitalizations and ambulatory visits for the condition (with no more than 1 encounter per individual per day per condition).

<sup>c</sup> Individuals with at least 1 hospitalization or ambulatory visit for the condition.

<sup>d</sup> Rank is based on number of encounters, individuals affected, or hospital bed days in the respective columns within the listing of 157 burden-related disease conditions.

Nine pairs of tied values for medical encounters and 11 pairs of tied values for individuals affected were given the same ranking. For hospital bed days, there were 61 conditions with the rank of 93 (0); 17 other conditions had tied rankings.

<sup>e</sup> Conditions affecting newborns erroneously coded on service member medical records.
